

# ***Real Power = Real Relief***

**TYPICAL BATH**  
Limited Back Coverage

Typical tubs are built to keep costs low—not to maximize performance. Fewer jets, underpowered pumps and lower-cost components can mean a weaker massage, less relief and less reliable performance over time.

**HYDRO MASSAGE**  
Full Back Coverage

***Hydro Massage Baths are built for performance, with powerful pumps and more jets—purposefully positioned to target the areas most in need of relief. The result is a deeper, more targeted massage and a more therapeutic experience.***

Back massage systems vary by model and series.

***Don't Forget About Your Feet!*** 

# Your feet carry you through every step you take.

They're an intricate system of muscles, nerves, joints and tendons working together to support the way you stand and move. *As the foundation of your movement, how your feet feel can affect how your entire body feels.*

Targeted therapeutic massage can provide much-needed relief to some of the hardest-working parts of your body.

## Sole Soothers™

A DEEPER LEVEL OF RELAXATION

Our exclusive Sole Soother jets deliver seven targeted streams to each sole, providing a focused, invigorating foot massage where you actually want it.

### TYPICAL BATH FOOT JET

Most foot jets simply direct a single stream toward your toes, often missing the sole of your foot.
